EE

Lesson plan

Name of Faculty	ABHISHEK KUMAR	
Discipline	EE	
Semester	Third Sem (3rd sem)	
Subject	Electrical Machines-I	
Lesson Plan Duration	From Sep 2023	
Work load [Theory + Practical] Per Week	[04+06]	

Week	Day	Theory Topic/ Assignment/ Test	No.	Practical
1 st	1 2	Unit 1: Introduction to Electrical Machines Definition of motor and generator	1	To measure the angular displacement of rotor of the three-phase synchronous machine with
-	3	Torque development due to alignment of	-	respect to the stator on application of DC to the field winding and simultaneously to each
		two fields and the concept of torque angle.		phase-winding in sequence. OR Measurement of the angular displacement of the rotor of a slip-ring induction motor on
	4	Electro-magnetically induced emf, Elementary concept of an electrical machine.		application of DC to stator of motor winding in sequence and simultaneously to each phase of rotor winding.
2 nd	1	Comparison of generator and motor, Generalized theory of electrical machines	2	Speed control of DC shunt motor (i) Armature control method (ii) Field control method.
_	2	Revision, Test/ Assignment	-	method.
-	3	Unit 2: DC Machines - Main constructional features, Types of armature winding.		
	4	Function of the commutator for motoring and generation action.		
3 rd	1	Factors determining induced emf,	3	Study of DC series motor with starter (to
	2	Factors determining the electromagnetic torque.		operate the motor on no load for a moment.
_	3	Various types of DC generators	-	
	4	Significance of back e.m.f		
4 th	1	the relation between back emf and terminal voltage.	4	Determine efficiency of DC motor by Swinburne's Test at (i) rated capacity (ii) half full load.
	2	Armature Reaction		
	3	Methods to improve commutation	-	

	4	Performance and characteristics of different types of DC motors		
5 th	1	Speed control of dc shunt/series motors	5	To perform open circuit and short circuit test for determining: (i) equivalent circuit (ii) the
	2	Need of starter		regulation and (iii) efficiency of a transformer
	3	three-point dc shunt motor starter and 4- point starter		from the data obtained from open circuit and short circuit test at full load.
	4	Electric Braking	-	
6 th	1	Applications of DC motors	6	To find the efficiency and regulation of single- phase transformer by actually loading it.
	2	Faults in dc machines and their retrospective.		phase transformer by actually loading it.
	3	Losses in a DC machine	-	
	4	Determination of losses by Swinburne's test		
7 th	1	Rating and Specifications of DC machines	7	Checking the polarity of the windings of a three-phase transformer and connecting the
	2	Revision,	-	windings in various configurations.
-	3	Test/Assignment	-	
	4	Unit 3: Single Phase Transformer- Introduction.		
8 th	1	Constructional features of a transformer and parts of transformer	8	Finding the voltage and current relationships of primary and secondary of a three-phase transformer under balanced load in various
	2	Working principle of a transformer	-	configurations conditions such
	3	EMF equation		as
	4	Transformer on no-load and its phasor diagram	-	(a) Star-star
9 th	1	Transformer – neglecting voltage drop in the windings – Ampere turn balance – its phasor diagram.		(b) Star-delta (c) Delta-star
	2	Mutual and leakage fluxes, leakage reactance.		(d) Delta - Delta configuring conditions.
-	3	Transformer on load, voltage drops and its phasor diagram.		
	4	Equivalent circuit diagram		
10 th	1	Relation between induced emf and terminal voltage, voltage regulation of a transformer- mathematical relation		

	2	Losses in a transformer
	3	Open circuit and short circuit test.
	4	Calculation of efficiency, condition for maximum efficiency-maintenance of Transformer, scheduled Maintenance.
11 th	1	Auto transformer construction, working and applications
-	2	Different types of transformers including dry type transformer
-	3	Rating and Specifications of single-phase transformer
	4	Revision
12 th	1	Test/ Assignment
	2	Unit 4: Three Phase Transformer- 1 Construction of three phase transformers and accessories of transformers such as Conservator, breather, Buchholtz Relay, Tap Changer (off load and on load) (Brief idea).
	3	Types of three phase transformer i.e. delta-delta, delta-star, star-delta and star- star.
	4	Star delta connections (relationship between phase and line voltage, phase and line current)
13 th	1	Conditions for parallel operation (only conditions are to be studied)
-	2	Difference between power and distribution transformer
F	3	Cooling of transformer
	4	Rating and Specifications of three phase transformers
